

## **Escaping Poverty Traps**

*Connecting the Chronically Poor  
to Economic Growth*

**Brad Barham** is a professor in the Agricultural and Applied Economics Department at the University of Wisconsin-Madison. His research program centers on themes related to Wisconsin agriculture, technology adoption and innovation, and environment and development issues, especially in Latin America. He has active research projects on agricultural biotechnology adoption, university ag-biotech patents and spillovers, structural change in Wisconsin dairy farming, the equity and efficiency impacts of land market reforms in Central America, and resource use patterns of peasants in biodiverse regions of the Peruvian Amazon.

His extension program focuses on making the Program on Agricultural Technology Studies (PATS) useful to the UW-Extension system, especially in the Agriculture and Natural Resource program, as well as to other farmers organizations and other agricultural professionals concerned with the structure, conduct, and performance of agriculture in Wisconsin. As the Co-Director of PATS, his main responsibility is to oversee research-extension projects related to the health and vitality of Wisconsin agriculture and Wisconsin farm families.
